To: Satish Kumar <satish.savvy@gmail.com>

(To whomsoever it is concerned)

13/06/2018

Respected Sir / Madam,

I am given to understand that Dr. T. Satish Kumar is applying for a faculty position in your esteemed Institute. I have known Satish Kumar from as early as 2003 when he was my colleague at Sona College of Technology. Later he became my student where he took up a course on Agent based Intelligent Systems under my tutelage. He showed his keen sense of understanding and a special inclination towards solving real world problems. He took upon various challenges and combined some of these concepts with those of operating system algorithms. Subsequently, he carried out a project on **'Dynamic Session migrate on OS failure systems'** under my tutelage and also published a paper. His work was recognized when the paper titled '**Session migration due to Operating system failure**' was given due recognition at the conference held at Adhiyman College of Engineering in March 2006. He built on the same during his Doctoral Programme. The quality of his research work on his thesis project was compelling and he managed to find amazingly simple solutions to very challenging problems. His contributions in group discussions are precise to the point and needs no further elaborations.

Overall, his sense of commitment has been exemplary and makes all efforts to train and counsel the students in their areas of weakness. His perseverance in completing the task at hand is something that cannot be described but only observed. Of late, he has also become an excellent administrator where he is able to coordinate with a large number of faculty members in his vicinity and take charge of a number of co curricular and extracurricular work be it conducting examinations or organizing conferences.

Taking these views into consideration, I strongly recommend Satish Kumar for the Professor's Post in your esteemed organization. I am sure the Institute would be immensely benefited by his physical presence. I am sure that he would continue to show his commitment wherever he is placed. Hoping my request would get due consideration.

Regards

- Anand

Dr. S. Krishna Anand, Professor

Electronics and Computer Engineering Department,
Sreenidhi Institute of Science & Technology
